

Table of contents

Preface	9
List of figures and tables	11
Introduction	13
Literature review	15
1. What is the nonmedical use of prescription drugs?	15
2. Types of medicines	16
2.1 Analgesics	16
2.2 Tranquillisers, sedatives and hypnotics	17
2.3 Central nervous system stimulants	17
3. Context of use	17
3.1 Motives for use	17
3.2 Initiation and trajectory	21
3.3 Profiles of nonmedical users	22
3.4 Effects and outcomes	25
3.5 Use patterns	27
3.6 Polysubstance use	28
3.7 Attitudes and social acceptability	29
3.8 Sources of information	32
4. Supply	32
4.1 Sources of supply	33
4.2 Diversion	34
4.3 Availability and accessibility	35
5. The European and national context	35
5.1 Epidemiology of NMUPD in Europe	35
5.2 Epidemiology of NMUPD in Belgium	44
5.3 Belgian policy and legislation regarding psychoactive medication	51
5.4 Prescribing practices in Belgium	56
6. The international legal context	58

Methods	61
1. Conceptual framework and operationalisation	61
2. Data collection and analysis	62
2.1 Online survey	62
2.2 In-depth interviews	63
2.3 Online forums	64
3. Ethical considerations	66
4. Limitations	67
Results	69
1. An overview of our sample	69
1.1 Sociodemographic characteristics	69
1.2 Medical and nonmedical prescription drug use	72
1.3 Medical conditions and healthcare	74
1.4 Psychoactive substance use	74
2. Initiation	76
2.1 Initiation age	77
2.2 Supply channels	78
2.3 Reasons for initial use	81
3. Motives for use	86
3.1 Performance enhancement	88
3.2 Self-medication	90
3.3 Recreational use	92
3.4 Intertwined motives	96
4. Use patterns	97
4.1 Type of nonmedical use	97
4.2 Frequency of use	98
4.3 Dose	101
4.4 Administration methods	103
4.5 Concurrent substance use	106
4.6 Setting of use	109
4.7 Problematic use	111
5. Effects	113
5.1 Desired effects	114
5.2 Side effects	117
6. Supply	120
6.1 Sources of supply	120

6.2	Diversion	127
6.3	Prices	130
6.4	Perceived availability and accessibility	131
7.	Evolution	132
7.1	Transitions in NMUPD	132
7.2	Stopping NMUPD	137
8.	Attitudes and perceptions	139
8.1	Acceptability and users' justifications	139
8.2	Risk perceptions	143
8.3	Opinions on access and regulation	148
8.4	Perceptions about future use	151
8.5	Social acceptability and peer use	152
9.	Risk management strategies	154
9.1	Use and conditions for use	155
9.2	Disclosure to other people	158
9.3	Informing oneself	160
9.4	Supply source	160
10.	Information	161
10.1	Information-seeking behaviour: types of information	162
10.2	Channels or sources of information	163
11.	Rapid analysis of online discussion forums	166
11.1	Online forums in interviews/survey results	167
11.2	Explorative analysis of online forums	168
12.	The effect of COVID-19 on NMUPD	178
12.1	Access and availability	178
12.2	Patterns of use	180
12.3	Impact on the use of illicit drugs	182
	Conclusions	183
1.	Young adults' perceptions of their nonmedical use practices, associated risks and social acceptability	184
2.	Information needs and sources	188
3.	Discussions about NMUPD in online communities of (potential) users	189
4.	Policy recommendations to prevent or reduce NMUPD and related harms among young people	191
4.1	Policy area: society	191

4.2	Policy area: education	196
4.3	Policy area: household	201
4.4	Policy area: healthcare	202
4.5	Policy area: online communication	206
4.6	Policy area: recreational contexts of use	208
4.7	Policy area: future research	209
